

Hard Wired Reliability

CV Series Battery Chargers

General Information

The right choice for all your gel battery charging applications.

The Vulcan Easygel series of single phase taper chargers are designed to charge all small sealed gelled electrolyte batteries or AGM type batteries. Several different voltages and currents are available. In order to operate merely connect the battery; all operation is automatic.

Standard Features

- Heavy-duty copper wound transformer provides stable output current for a wide range of input voltages.
- 4 ft charging cables.
- Full wave rectifier - conservatively rated.
- Fully automatic operation. - Automatic start, - automatic stop, - automatic maintain / refresh.
- State of charge LED indication.
- Rugged steel cabinet with integrated wall mounts.
- D.C. fuse protection.
- 8 ft. heavy-duty power cord.

Technical Data

Model	Volts DC	Amps DC	8-12-16 hr. AH Rating	Volt AC	Amps AC
CV 12/5EA	12	5	25-37-50	120	1.3
CV 12/10EA	12	10	50-75-100	120	2.0
CV 12/15EA	12	15	80-120-160	120	3.5
CV 24/5EA	24	5	25-37-50	120	2.3
CV 24/10EA	24	10	50-75-100	120	4.5
CV 24/15EA	24	15	80-120-160	120	5.0
CV 24/20EA	24	20	110-150-190	120	8.0
CV36/15EA	36	15	80-120-160	120	8.0
